Download

Download and install this program to your Mac Click "Options" to configure some settings.. I just watched the BBC crime drama Ashes to Ashes as a video stream connecting to iPlayer over a Wi-fi connection.. Interestingly, TVNZ is embracing this viewing model for its TVNZ OnDemand portal, which shows its confidence in streaming over broadband and even dial-up connections in New Zealand.

In London for a few days, I've had the chance to test out both the streaming and download models and have found the service overall to be very user-friendly and pretty good in terms of quality.

However, BBC Worldwide is working on an international version, which we will make available as soon as possible.. I was able to skip forward through the show from the outset Streaming the BBC content means you don't have to ait for it to download - the quality isn't as good streaming, you occasionally see audio out of sync with the picture and some pixilation, but it's instant digital viewing without the need to own a digital video recorder.. But the BBC suggests on its website that an international version of the iPlayer is in the works: 'Rights agreements mean that BBC iPlayer television programmes are only available to users to download or stream (Click to Play) in the UK.. Brits on broadband connections may prefer the download option for playback of shows.. Hands On With Iplayer Download For MacKey Points: You've got to hand it to the BBC, the British state broadcaster has adapted to the digital age well creating a user-friendly online platform to showcase its wealth of good programmes.
